relevence - It is the process of adding features of 1 Scope Creepi-It is the process of account scope, without functionality to the project scope, without functionality to the effects it can how taking into account the effects it can how on time, costs & Resources. Or it is the extra work that you did not initially plan to do of work that is not reflected or included in the agreed scope of the project. It is coused by key project stakeholder hanging requirements or sometimes from nternal miscommunication

PAGE No. / Poor Communical? Poor communication of budget extincted are not when original time of budget extincted are not met, fixe to m poor communication miscom munical. Two scenarios are possible. Your fear has been approached by the went facked to make " few changes to the scope You have trusted to communicate project require ments to the team of thus project stides in the unknown direction. 11) Sporsely defined Requirements: It is a direct result of poorly defined - The undear scope from the beginning can't lead to a meaningful result. - This happens when the fear is devied to take the time needed to collect f define detailed requirements. missing Documentation - one of the main reason having project scope creepis the look of a single source of fouth for the teams, clients & stakehold It there is lack of statement of worles depth in specifical document, your project turns into a centre of idea, rather must clearly defined objectives. 33. 4
